

THE GLOBAL LEADERSHIP RETREAT

...authentic leadership begins from within

About The Global Leadership Retreat

- To challenge and reinvent your corporate agenda and take your organisation to the next level, takes courage. At some point in the process, you come face to face with the fact that what really drives your organisation isyou.
- To re-invent your organisation, you have to reinvent yourself. You have to step inside and explore the connection between your core inner being and your actions, your performance, your standards.
- The Global Leadership Retreat is a portal for leaders and senior teams to engage with deep processes that enhance mindfulness and expand consciousness through innovation and intention in alignment with both source and a sustainable planet.
- Our intention is to invoke fresh personal and team insights that awaken within you a spirit of calm, certainty and creativity that lead to new levels of perception and right action in times of both great change and great possibility.

Who we are

What we do

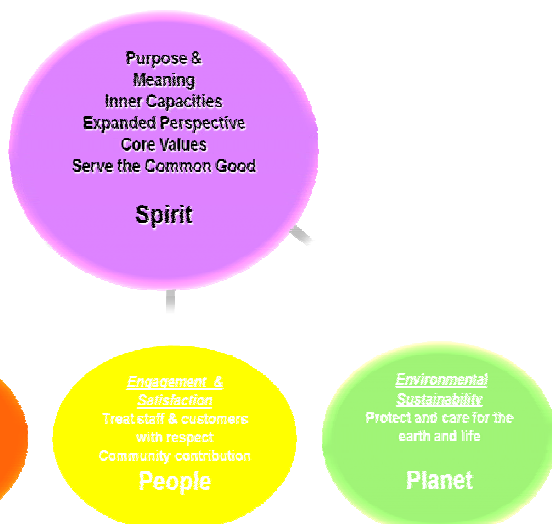

Our work elicits new perspectives and new ways of being through:

- Deep diving people into higher consciousness to create space for the regeneration of life, and re-alignment with meaning and purpose.
- Building understanding of the systemic relationship between people's inner and outer worlds thus bridging their 'individual story' and the 'world's story' i.e. "As I change the world changes"
- Creating a space that elicits and allows people to become global leaders by:
 - Recognising their innate wisdom
 - Igniting their innate passion for contribution to the 'common good'
 - Fully expressing their inner aspiration of who they are
 - Deeply knowing they are the cause of an enlightened global future

The Conscious Business

Focus on the Emerging Corporate Consciousness

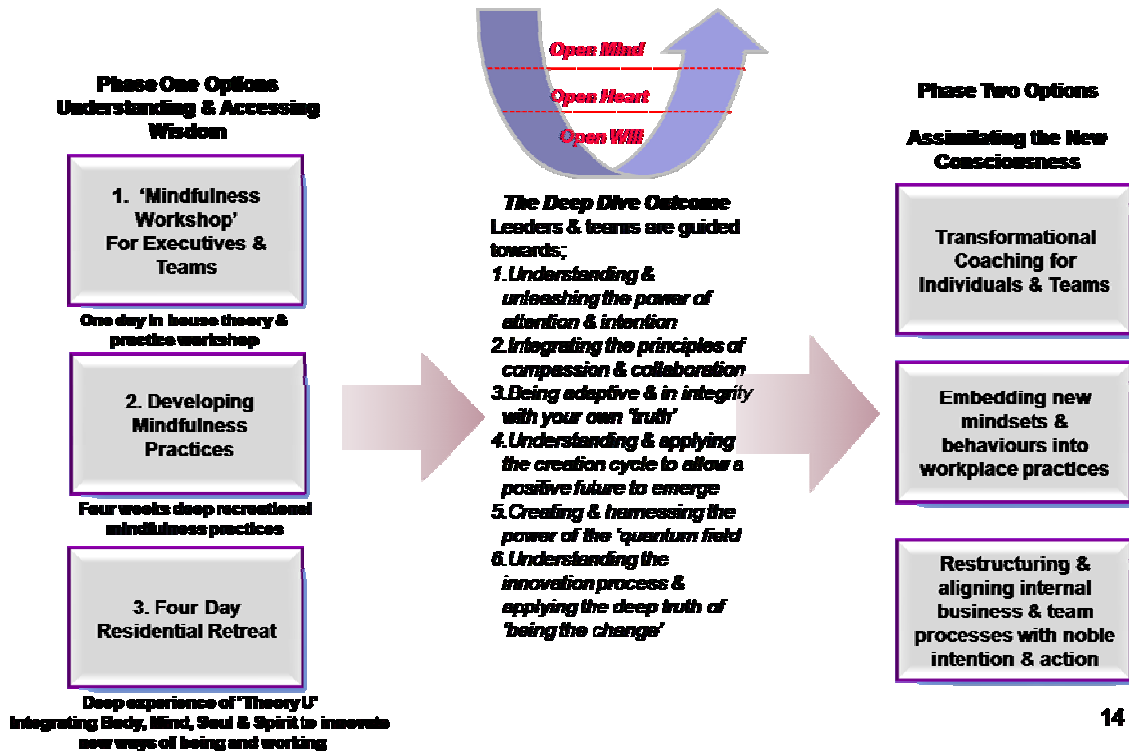

"Companies who are breaking the mould are moving beyond corporate responsibility and social innovation. These companies are the vanguard of the New Paradigm. They view community needs as opportunities to develop ideas and demonstrate business technologies, to find and serve new markets, and to serve long-standing business problems" Rosabeth Moss Kanter, Harvard Business School.
